Land for sale with an area of 2,450 m². It comes from a combination of 2 plots. These plots have the following urban planning conditions:

Building density index 0.5555 m²t/m² of land: total buildable m²: $2,299.33 \times 0.5555 = 1,277.28$ m²t

Applicable zoning regulations and their compatible uses.

Maximum dwelling density: 10

Maximum height: 2 stories.

50% occupancy.

A 165 m²t single-family home with a swimming pool has been built. This house would be deducted from the total buildable area, as well as from the density and the land occupancy. Therefore, there would remain to build 9 houses, 1,111 m² of roof, on a jointly owned plot of about 1,300 m² that remains free.

The price is for the property together with the land, with the possibility of building 9 more homes!
